DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 16 and 31 – 35, drawn to semiconductor laser device, classified in class 372, subclass 43.

Group I, claims 1 – 6, and 31 – 35, drawn to semiconductor laser device wherein a spontaneous-emission absorbing layer.

Group II, claims 13 – 14, drawn to semiconductor laser wherein the recess.

Group III, claims 7 – 12, drawn to semiconductor laser device wherein a spontaneous emission protective film.

Group IV, claims 15 – 16, drawn to semiconductor laser device wherein a spontaneous emission protective member.

- II. Claims 17 – 23, drawn to optical disk apparatus, classified in class 369, subclass 275.1⁺.

Group V, claims 17 – 18, drawn to optical disk apparatus wherein a spontaneous-emission absorbing layer.

Group VI, claims 19 – 21, drawn to optical disk apparatus wherein a spontaneous emission protective film.

Group VII, claim 22, drawn to optical disk apparatus wherein the recess.

Group VIII, claims 23, drawn to optical disk apparatus wherein a spontaneous emission protective member.

III. Claims 24 - 30 drawn to an optical integrated unit, classified in class 372, subclass 50.

Group IX, claims 24 -25, drawn to optical integrated unit wherein a spontaneous-emission absorbing layer.

Group X, claims 26 - 28, drawn to an optical integrated unit, wherein a spontaneous emission protective film.

Group XI, claims 29, drawn to an optical integrated unit, wherein the recess.

Group XII, claim 30, drawn to an optical integrated unit, wherein spontaneous a emission protective member.

The inventions are distinct, each from the other because of the following reasons:

Inventions III, II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups II and III is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III and II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Group I, II, III, IV, V, VI, VII, VIII, IX, X, XI, and XII as shown, discloses different scoop of the invention and therefore: Because these inventions are distinct for the reasons given above, election of species for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
